

**Thinking about the next steps in your ICT-related research?
Apply for the SLICES-SC Open Call and let us help you take
your project to the next level!**

Why choose SLICES?

We are free and easy to access

We provide free-of-charge, transnational access to state-of-the-art research infrastructures with the possibility for travel grants if needed

We support you all the way

We also provide logistical, technological, and scientific support from the early planning stages of your experiment to the very end including the specific training necessary to best utilize the chosen infrastructure.

You can collaborate with the best of the best

With our partners across Europe, we bring together highly skilled, top experts with a special focus in 5G, 6G, NFV, Internet of Things, cloud computing and more!

We provide flexible solutions

Access to our research and testing facilities may be physical or remote based on your specific needs and it is not limited to a single infrastructure! Physical access may be split into two separate visits.

Who is eligible?

Any team of one or more users where the majority of the team works in a different (preferably EU or EU-associated) country than where the desired infrastructure is located and is allowed to disseminate all related results and the knowledge gained.

When and how to apply?

The next cut-off date for submissions is **15/May/2023** with two more dates to follow. All proposals must be in English and submitted through our website using a provided template. For further details on our call including obligations, post-access requirements, and details on the application procedure, head over to [our website](#).

We can't wait to hear about your project!
